

LifeAir

IonFlow Evolution Gold

Air purification quieter and more sophisticated than ever.

Dimensions:
7.5 x 23 inches / 19 x 59 cm

Weight:
5.7 lbs / 2.7 kg (excl. adapter)

Room size:
Approx. 540 sq ft / 50 m²

Noise level:
21 dB (A)

Energy consumption:
5 W

Benefits

99.94%

Ultra-fine particle
reduction

LifeAir gives you the cleanest air you can get! According to the scientific community, size matters. More than 90% of all particles in the air are smaller than PM 0.1. These particles are overwhelmingly the most harmful to your health – particles that LifeAir catches extremely efficiently!

Inactivate >97%
virus in the air

LifeAir is your best protection against virus infections, a scientifically proven fact! According to a seven years research study LifeAir IonFlow air purification makes 97% of virus harmless immediately in the air making sure they will never bother you.

Soundless

This air purifier will not disturb your precious sleep or important work! It will do a better job as the best HEPA air purifier but without a sound! Less than 21 dB(A)! This can be compared to most other air purifiers' noise level of 35-80 dB(A).

Filterless

No need to ever buy an expensive filter again, instead use a LifeAir reusable particle collector that you easily rinse in water. The fact that you never need to buy a filter will save you lots of money in comparison to filter based air purifiers. Add the environmental aspect and the whole world is a winner!

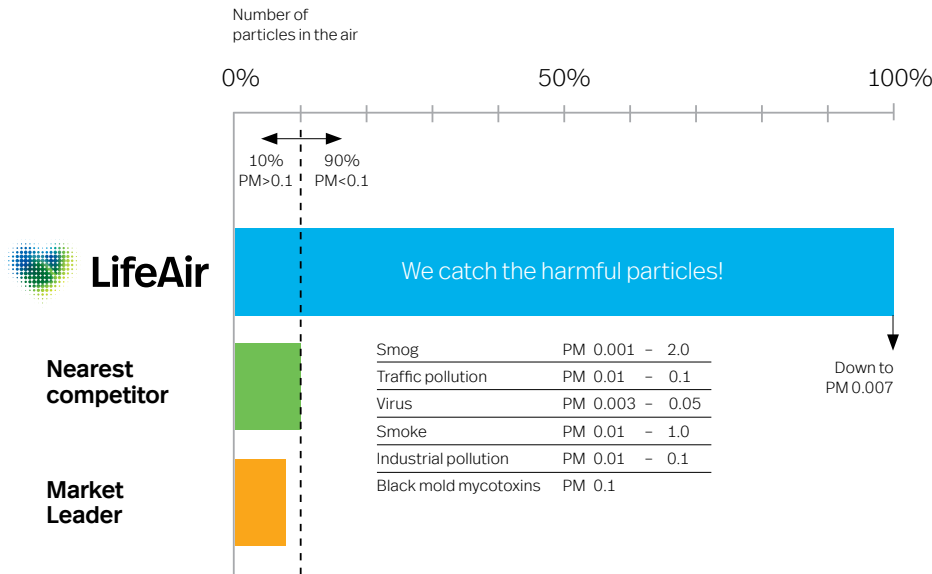

Ozone free

Some air purifiers emit ozone, not LifeAir! Ozone can cause health problems such as asthma, emphysema, and COPD. Ozone has traditionally been a side effect of many air purifiers meaning the higher ion generation the higher the ozone level. LifeAir alone has been able to solve this problem and can generate an extremely high concentration of negative ions, thus a very efficient air purification without ozone.

Nobody beats LifeAir

According to the scientific community, size matters. 90% of all particles in the air are smaller than PM0.1. These particles are overwhelmingly the most harmful ones to your health and actually the only ones that matters to go after. LifeAir has a unique ability to efficiently remove these particles from the air, all the way down to PM0.007. Beat that if you can!

Proven efficiency by government agency

Particle reduction for IonFlow Evolution Gold

Find complete test report on www.lifeair.com

We are your best protection against virus. A scientifically proven fact.

LifeAir IonFlow air purifiers are scientifically proven to neutralize more than 97% of virus in the air!

The virus are made harmless immediately in the air as the negative ions attach to them making sure they will never bother you.

This is your best protection against influenza and other infections caused by airborne virus, bacteria and other microbes.

How it works

Effectively removes:

Smoke

Traffic pollution

Mold

Pet allergen

Virus

Bacteria

Industrial pollution

Pollen
